LIST OF ABSTRACTS

Session I : Weathering, Soil Science and Erosion.

Abraham LERMAN (Northwestern University, Evanston, USA): Weathering and erosional controls of geochemical cycles. 13

Milan PAVICH (USGS, Reston, USA): Characteristics, origin and residence time of saprolite and soil of the Piedmont Upland, Virginia (USA) and model testing using cosmogenic ^{10}Be. 15

Michael VELBEL (Michigan State University, East Lansing, USA): Mechanisms of saprolitization, isovolumetric weathering and pseudomorphous replacement during rock weathering. A review. 17

AMBROSI J-P. and CHEN Y. : ESR dating for lateritic weathering: preliminary approach. 19

BAIN D.C., MELLOR A., WILSON M.J. and DUTHIE D.M.L. : Chemical and mineralogical weathering in an upland granitic catchment in Scotland. 23

BEAUVAIS A., BOEGLIN J-L., COLIN F., MAZALTARIM D. and MULLER J-C. : Geochemical evolution and degeneration of ferricretes under a humud tropical climate in the East of Central African Republic. 25

BENEDETTI M., BOULEGUE J., HYERONIMUS B., KOTSCHOUBEY B. and PINTO DA SILVA E. : Present behaviour of gold in lateritic environment, Salobo (State of Para, Brazil). 27

BOULANGE B., CARVALHO A. and MELFI A. : Geochemical characteristics of african and braziliian bauxites deposits: SiO_2-Al_2O_3-Fe_2O_3 system and Ti, Cr, V and Fe_2O_3 relations. 30

BOWSER C.J. and JONES B.F. : Geochemical constraints on groundwaters dominated by silicate hydrolysis: an interactive spreadsheet, mass balance approach. 33

CHEVALIER Y. and BECH J. : Weathering of the granitoid rocks of western Mediterranean areas; some examples of Provence (France) and Catalonia (Spain). 36

COLIN F. and VIEILLARD P. : Dissolution and translocation of residual gold particles under equatorial lateritic conditions. 38

CUMMINGS M.L. and FASSIO J.M. : Geochemistry and mineralogy of ferruginous bauxite developed from basalt flows in the Pacific Northwest, USA. 40

DAHANAYAKE K. and SUBASINGHE S.M.N.D. : Variable mineralogy and solubility of a terrestrial phosphorite resulting from differential weathering phenomena; an example from Sri Lanka. 42

DEL NERO M. and FRITZ B. : Thermodynamic modelling of the influence of water activity on the gibbsite-kaolinite-quartz system in lateritic weathering conditions. 45

DELVIGNE J. : Hypogene and supergene alterations of orthopyroxene in the Koua Bocca ultramafic intrusion, Ivory Coast. 49

FERNANDEZ-MACARRO B. and BLANCO-SANCHEZ J-A. : The palygorskite-contained paleosols of the Talavan-Torrejon el Rubio basin (Caceres, Spain): mineralogical and gochemical evolution. 54

FREYSSINET P., ROQUIN C., MULLER J-C., PAQUET H. and TARDY Y. : Geochemistry and mineralogy of soils covering laterites and their use for gold exploration. 58

FREYSSINET P., LAWRANCE L.M. and BUTT C.R.M. : Geochemistry and morphology of gold in lateritic profiles in savanna and semi-arid climates. 61

GISLASON S.R., ARNORSSON S. and ARMANNSSON H. : Chemical denudation rates in SW-Iceland. 64

GRANA-GOMEZ M.J., BARRAL-SILVA M.T. and SEOANE-LABANDEIRA S. : Cobalt fractionation in surface horizons of soils from the province of Lugo (Spain). 68

GRIMM B. and FRIEDRICH G. : Weathering effects on supergene gold in soils of a semi-arid environment, Gentio do Ouro, Brazil. 70

HYERONIMUS B., KOTSCHOUBEY B., BOULEGUE J., BENEDETTI M., GODOT J-M. and TRUCKENBRODT W. : Aluminium behaviour in some alterites of eastern Amazonia (Brazil). 74

HYERONIMUS B., BOULEGUE J. and KOTSCHOUBEY B. : Gallium behaviour in some intertropical environment alterations. 78

JONGMANS A.G., VAN DOESBURG J.D.J. and VAN BREEMEN N. : Micromorphology and mineralogy of weathering and neoformation phenomena in a quaternary terrace sequence of the Allier, Limagne, France. 83

KOLOKOLTSEV V.G., LISITSYNA M.A., MORDBERG L.E., NESTEROVA E.N. and RUBLEV A.G. : The nature of some trace elements in paleozoic bauxites and weathering rocks of the East-European platform. 86

KROONENBERG S.B. : Geochemistry of quaternary fluvial sands from different tectonic regimes. 88

KROONENBERG S.B. and HOORN M.C. : Bulk geochemistry of tertiary and quaternary fluvial sands in the Colombian Amazones. 92

LE GLEUHER M. : Olivine weathering in basalts near Cooma, New-South-Wales, Australia. 96

LO MONACO S. and YANES C. : Model for bauxite formation: Los Pijiguaos, Venezuela. 98

MADE B. and FRITZ B. : The composition of weathering solutions on granitic rocks: comparison between field observations and water-rock interaction simulations based on thermodynamic and kinetic laws. 100

MULLER J-P. and CALAS G. : Paramagnetic centers in kaolinite and the history of weathering crusts. 105

NIEUWENHUYSE A. : Formation of andosols in a chronosequence of andesitic beach ridges in Costa Rica. 108

NOACK Y., MATHIEU D., CLAPAROLS C., LOUBET M., BERNAT M. and GONCALVES N. : Weathering of basalts in north Parana Basin (Brazil): chemical aspects. 111

NYOBE J-B. and NNI J. : On the geology and geochemistry of the Fongo Tongo bauxite deposit - Bammbouto mountains (Cameroon Line). 114

PARRON C., SIMON B., OLTRA P-H. and COLIN F. : Evidence of textural and chemical evolutive paths by means of image processing in weathering and diagenetic processes. 116

PEURANIEMI V. : The behaviour of the trace elements in the weathering crust in western finnish lapland. 118

PRUDENCIO M.I., SEQUEIRA-BRAGA M.A. and CABRAL J.M.P. : Basalts weathering in the Lisbon volcanic complex (Portugal). 119

RAMIREZ A. : Chemical weathering on the Tuy river basin, Venezuela. 122

ROQUIN C., PAQUET H., FREYSSINET P., BOEGLIN J-L., MAZALTARIM D. and TARDY Y. : Lithodependance and homogeneization of mineralogical and chemical composition of ferricretes. 124

SMYKATZ-KLOSS W. and JOACHIM H. : Kaolin and silica minerals of South African silcretes. 128

TABOADA T., ROMERO R. and GARCIA C. : Weathering evolution of a biotite granite (El Pindo, Galicia, NW Spain). 130

TARDY Y., TROLARD F., ROQUIN C. and NOVIKOFF A. : Distribution of hydrated and dehydrated minerals in lateritic profiles and landscapes. 133

TOSIANI D.T., LO MONACO S., RAMIREZ A. : Geochemistry of major and trace elements in Los Pijiguaos bauxite ore, Venezuela. 137

VAN DOOREMOLEN W.A., WIELEMAKER W.G., VAN BREEMEN N., MEIJER E.M. and VAN REEUWIJK L.P. : Chemistry and mineralogy of andosols of various age in a soil chronosequence on andesitic lahars in Costa Rica. 139

VELDKAMP A. and FEIJTEL T.C. : Regional weathering modelling with bulk geochemistry: a case study for the Allier terrace sands, Limagne, France. 142

VELDKAMP A. and JONGMANS A.G. : Trachytic pumice weathering, Massif Central, France: geochemistry and micromorphology. 145

VELDKAMP E. and JONGMANS A.G. : Weathering of alkali basalt gravel in the two older Allier river terraces, Limagne, France. 148

WESSELINK L.G. : Aluminium weathering in soil acidification modelling. 150

YANES C. and RAMIREZ A. : Chemical weathering in the Venezuelan Guiana shield. 153

Session II : Global environment, global climates and ancient sediment cycles.

Edouard BARD (Lamont-Doherty Geological Lab. Palisades, USA and CFR, Gif sur Yvette, France): U/Th ages obtained by mass spectrometry in corals from Barbados. 157

Robert BERNER (Yale University, New Haven, USA): Global biogeochemical cycles of carbon and sulfur and atmospheric O_2 over phanerozoic time. 159

Lee KUMP (Pennsylvania State University, University Park, USA): Phanerozoic chemical weathering and paleoclimate. 160

BENEDETTI M., BOULEGUE J. and VERHAGUE I. : Transfer and deposition of gold in the Congo watershed. 162

CERLING T.E. and QUADE J. : Global ecologic and climatic change during the Neogene: stable isotopic evidence from soils. 164

KRAMER J.R., BRASSARD P., PATRY G. and TAKACS I. : Sensitivity of terrestrial carbon cycle on atmospheric carbon dioxide. 166

LOPEZ GALINDO A. and ODDONE M. : The distribution of clay minerals, rare-earths and trace elements in middle cretaceous mudstones of the southern Iberian paleomargin. 169

MAGNIN F., GUENDON J-L., QUINIF Y., ROIRON P. and THINON M. : Travertine as evidence for environmental and climatic changes; a middle Pleistocene example in mediterranean France. 173

MARQUES M.M., VIEIRA M.C., ABREU M.M., PRUDENCIO M.I. and CABRAL J.M.P. : The caliche of Odivelas-Serpa area of Alentejo (Portugal): an approach to their paleoenvironmental interpretation. 176

TARDY Y., KOBILSEK B., ROQUIN C. and PAQUET H. : Influence of periatlantic climates and paleoclimates on the distribution and mineralogical composition of bauxites and ferricretes. 179

TAYLOR G., TRUSWELL E.M., EGGLETON R.A. and MUSGRAVE R. : Cool climate bauxite. 183

Session III : Modern sediments and early diagenesis.

Susan BRANTLEY ((Pennsylvania State University, University Park, USA): Marine evaporites, bittern seepage and the genesis of subsurface brines. 187

Judith McKENZIE (EAWAG, Zurich, Switzerland): Dolomites: reconciling modern examples with the ancient record. 190

ANSCHUTZ P., BLANC G., FRITZ B. and BOULEGUE J. : Characterisation of the physico-chemical conditions during the settling of metalliferous sediments in the Atlantis-II Deep (Red Sea). 192

ARMENTEROS I., HERVALEJO M.V. and BLANCO J.A. : The clayey ensemble and silicifications of the paraevaporitic marginal series of the south east of the neogene duero basin: mineralogy and geochemistry of its evolution. 194

CIDU R., FANFANI L., ZUDDAS P. and ZUDDAS P. : The travertine deposit at Funtana Maore (Central Sardinia, Italy). 198

JONES B.F., HANOR J.S., EVANS W.R. : Normative analysis of saline waters from the central Murray Basin, Australia. 201

MONACO A. : Modern sedimentation (processes and fluxes) and early diagenesis in the mediterranean continental margin. 204

SMYKATZ-KLOSS W., KOSSL H. and HOTZL H. : The gypsum karst area of Foum Tahahouine, Southern Tunisia: mineralogy and hydrogeochemistry. 206

VELDKAMP A. : Prediction of bulk chemical composition of fluvial sands from grain size data, Allier and Dore terrace sands, Limagne Rift valley, France. 208

WERSIN P., HOHENER P., GIOVANOLI R. and STUMM W. : A kinetic model for iron diagenesis in a lake sediment. 210

Session IV : Organic chemistry and biochemistry.

David HOLLANDER (IFP, Rueil-Malmaison, France): Environmental factors controlling the preservation and accumulation of organic matter. 215

Andre MARIOTTI (Université P.M. Curie, Paris, France): ^{13}C natural abundance as a tracer of soil organic matter turnover and paleoenvironment dynamics. 217

INGALL E.D., SCHROEDER P.A. and BERNER R.A. : Characterization of organic phosphorus in marine sediments by ^{31}P NMR. 220

PIRONON J. and BARRES O. : FT-IR microanalysis of hydrocarbon fluid inclusions. 224

THOMAS F., BOTTERO J-Y., MASION A. and GENEVRIER F. : Mechanisms of aluminium III hydrolysis with acetic and oxalic acid. 227

Session V : Late diagenesis and low-grade metamorphism.

Enrique MERINO (Indiana University, Bloomington, USA): The geochemistry of habits and textures of authigenic quartz. 233

BAUDRACCO J. and AOUBOUAZZA M. : Study of the variations in permeability and cationic exchange kinetics during solutions changes in clay sandstone. 235

EVANS J. : Quartz dissolution during shale diagenesis; implications for quartz cementation in sandstones. 239

MEYER A.J., PIRONON J. and PAGEL M. : Fluid inclusion and fission track thermochronology from the Brent sandstone reservoir (Alwyn area, North Sea). 241

MOGE M., PAGEL M. : Petrography, fluid inclusion and stable isotopes of Jurassic carbonate-cemented sandstones (Viking graben, North Sea). 243

PRUDENCIO M.I., ABREU M.M., WAERENBORGH J.C. and CABRAL J.M.P. : The mineralogy and chemistry of a hydrothermal veinlet intruded into a gabbroic rock alteration profile (Serpa, Portugal). 246

SCOPEL R., FORMOSO M.L.L., DUDOIGNON P. and MEUNIER A. : Hydrothermal alteration of basalts, Southern Parana Basin, Brazil. 249

Session VI : Geochemistry of clays and poorly crystallized minerals.

Georges CALAS (Universités Paris VI et VII, Paris, France):Crystal chemistry of clays and associated oxides: constraints for element transfer and mineral formation processes at the Earth's surface. 253

Yves TARDY (ORSTOM, Bamako, Mali and CGS, Strasbourg, France): Gibbs free energy of formation of hydrated and dehydrated clay minerals. 255

CLOZEL B., CALAS G., MULLER J-P., DRAN J-C. and HERVE A. : Kaolinites as dosimeters: a new possibility of tracing radionuclides migration. 259

CROVISIER J-L. and DAUX V. : Populations of clays formed by alteration of subglacial hyaloclastites from Iceland. 261

DUPLAY J., BUATIER M. : The problem of differenciation of glauconite and celadonite. 264

HAUFF P.L., KRUSE F.A. and THIRY M. : Characterization of interstratified kaolinite/smectite clays using infrared reflectance spectroscopy (1.2 - 2.5 m). 267

LOPEZ-GALINDO A. and MARTIN-ALGARRA A. : Mineralogy and geochemistry of middle-cretaceous clays in flysches in the Campo de Gibraltar complex (southern Spain). 271

MANCEAU A. and CHARLET L. : In-situ X-ray absorption study of the mechanism of Cr(III) oxidation at the Mn oxide/water interface. 275

MEIJER E.L. : Modelling of non-linear equilibrium relations in the soil-water system. 279

MOSSER C., PETIT S., PARISOT J-C., DECARREAU A. and MESTDAGH M. : Evidence of Cu in octahedral layers of natural and synthetic kaolinites. 281

NAGY K.L. and LASAGA A.C. : The effect of deviation from equilibrium on the kinetics of dissolution and precipitation of kaolinite and gibbsite. 283

PARRON C. and AMOURIC M. : Crystallochemical heterogeneity of glauconites and the related problem of glauconite-celadonite distinction. 286

POZO M., LEGUEY S. and MEDINA J.A. : Sepiolite and palygorskite genesis in carbonate lacustrine environments (Duero Basin, Spain). 290

STANJEK H., MURAD E. and SCHWERTMANN U. : Influence of Al substitution upon crystal size and room temperature Mössbauer spectra of natural hematites. 292

TROLARD F., BILONG P., GUILLET B. and HERBILLON A.J. : Halloysite - kaolinite - gibbsite - boehmite: a thermodynamical modelisation of equilibria as function of water and dissolved silica activities. 294

Session VII : Crystal growth and crystal dissolution under surface conditions.

David CRERAR (Princeton University, Princeton, USA): Kinetics of quartz dissolution in electrolyte solutions using a hydrothermal mixed flow reactor. 301

Richard REEDER (SUNY, Stony Brook, USA): The influence of growth mechanism and surface structure on the partitioning of trace elements into minerals: example from carbonate minerals. 305

ANBEEK C. : The influence of fracturing on apparent dissolution rates. 306

BOTTERO J-Y., TCHOUBAR D., QUIENNE P. and ARNAUD M. : Partial hydrolysis of ferric chloride salt. Structural investigation by photon corrrelation spectroscopy and small-angle X-ray scattering. 308

MATTHESS G. and SCHENK D. : Weathering rates derived from field studies and laboratory experiments with various aquatic solvents. 311

MULLER J-P. and BOUDEULLE M. : Oxy-hydroxides geneses and their interrelationships with kaolinite in a laterite. Petrological implications. 314

RIBET I. and THIRY M. : Quartz growth in limestone: example from water-table silicification in the Paris basin. 316

SHOTYK W. and NESBITT H.W. : Ligand-promoted dissolution of plagioclase feldspar: a comparison of the surface chemistry of dissolving labradorite and bytownite using SIMS. 320

STEEFEL C.I., VAN CAPPELLEN P., NAGY K.L. and LASAGA A.C. : Modelling water-rock interaction in the surficial environment: the role of precursors, nucleation and Ostwald ripening. 322

STIPP S. and HOCHELLA M.F. : Calcite surface reactions (restructuring and hydration) studied with X-Ray photoelectron spectroscopy (XPS) and low energy electron diffraction (LEED). 326

SZURGOT M. : Growth anisotropy of lopezite crystals. 329

VAN CAPPELLEN P. and BERNER R.A. : Crystal growth of marine apatite. 331

WHITE A.F. an PETERSON M. : The role of reactive surface areas in chemical weathering. 334

ZUDDAS P. and MICHARD G. : Trace elements behaviour during fluid-plagioclase interaction: experimental study. 337

Session VIII : Isotope geochemistry and REE geochemistry

Sam SAVIN (Case Western Reserve University, Cleveland, USA): Recent advances in the oxygen and hydrogen isotope geochemistry of silicates and oxides in low temperature systems. 341

Karl TUREKIAN (Yale University, New Haven, USA): The behaviours of Re and Os in crust formation and mobilization as inferred from the study of $^{187}Os/^{186}Os$. 343

AHAMDACH N., PAGEL M. and GIRARD C. : Radioisotopes redistribution of the ^{238}U series in the Peny episyenite (NW Massif Central, France). 344

BERNAT M., BOKILO J-E., YIOU F., RAISBECK G.M. and MULLER J-P. : ^{10}Be and natural isotopes of U and Th in a laterite cover from Cameroon. 347

BOULANGE B., MULLER J-P. and SIGOLO J-B. : Behaviour of the rare earth elements in a lateritic bauxite from syenite (Brazil). 350

BOULEGUE J., BARIAC T., MARIOTTI A. and DE KERSABIEC A-M. : Hyperfiltration-osmosis effects in compacting sediments: isotopic and chemical changes in pore waters. 352

BOYCE A.J., FALLICK A.E., HAMILTON P.J., ELORZA J. : Diagenesis of celestite in quartz geodes from the Cantabric Basin, Northern Spain: evidence from sulphur and strontium isotopes. 354

BRAUN J-J. and PAGEL M. : U, Th and REE in the Akongo lateritic profile (SW Cameroon). 357

CLAPAROLS C., DESPRAIRIES A. and LOUBET M. : Chemical and isotopic ($^{143}Nd/^{144}Nd$ and $^{87}Sr/^{86}Sr$) characteristics of black shales mesozoic series from the South Atlantic Ocean: evidence of contemporeanous volcanism. 360

DECARREAU A., BADAUT D. and BLANC G. : Origin and temperature formation of Fe rich clays from Atlantis II deep deposits (Red Sea). An oxygen isotopic geochemistry approach. 363

FLICOTEAUX R., WALTER A-V., BONNOT-COURTOIS C. and TOLEDO GROKE M-C. : Transformation and precipitation of phosphates during weathering: characterization by REE distributions. 365

FRANCE-LANORD C., MICHARD A., BOUQUILLON A. and TIERCELIN J-J. : Isotopic chemistry and sedimentology of the Bengali fan sediments: the denudation of the Hymalaya. 368

ILDEFONSE P., AGRINIER P. and MULLER J-P. : Crystal-chemistry and isotope geochemistry of alteration associated with the uranium Nopal I deposit, Chihuahua, Mexico. 371

MARKER A. and DE OLIVEIRA J.J. : The formation of rare earth element scavenger minerals in weathering products derived from alkaline rocks in SE-Bahia, Brazil. 373

MELFI A.J., FIGUEIREDO A.M., KRONBERG B.I., DOHERT W.D. and MARQUES L.S. : REE mobilities during incipient weathering of volcanic rocks of the Parana Basin, Brazil. 375

SOUBIES F., MELFI A.J. and AUTEFAGE F. : Geochemical behaviour of rare earth elements in alterites of phosphate and titanium ore deposits in Tapira (Minas Gerais, Brazil): the importance of the phosphates. 377

WALTER A-V., FLICOTEAUX R., GIRARD J-P., LOUBET M. and NAHON D. : REE pattern in apatites from the Juquia carbonatite, Brazil. 378
